Dear Educators,

Quality science education for every child matters to us at the Santa Fe Children’s Museum, and we have developed NEW Virtual Field Trips for your online classrooms for FREE!

Join the Santa Fe Children’s Museum for a dynamic interactive learning experience. Have one of our museum educators come right to your screen to deliver live-streamed education using your current classroom portal on a variety of STEM-related topics.

Every show meets NM Public Education Department standards for curriculum using Common Core and NM STEM Ready! Standards per grade level. Choose one of our pre-designed programs or let us customize one just for you!

Our current ready-to-go Virtual Field Trip topics are:

Grades K-2 (specific content varies and is tailored based on grade level)
   ❖ Fun in Space: An Introduction to Space Science
   ❖ Plants and Animals: An Introduction to Life Science

Grades 3-8 (specific content varies and is tailored based on grade level)
   ❖ Physical Science: Earth and Planetary Science
   ❖ Life Science: Biology and Ecosystems Science

More topics coming soon.

Each program includes an interactive lecture (20-60 minutes, depending on grade level) and a Live Q & A session with our museum STEM educator. We offer the newest technology in interactive software to take your class to the furthest corners of our universe – from deep space to the bottom of the ocean floor – there is no limit to where you can travel on a Santa Fe Children’s Museum Virtual Field Trip.

All that is needed is internet access through your online classroom and a reservation with our educator!

Please contact us for booking and more information at virtualfieldtrips@santafechildrensmuseum.org or (505) 363-5424.

We look forward to joining you and your class,

The Santa Fe Children’s Museum Programming Team
